

ESTATE AGENT PRO ENTERPRISE ADDITIONAL INFORMATION

Estate Agent Pro Enterprise will automatically use the API from AFD Software's Postcode Plus address management database if it is installed on the PC you are using. Postcode Plus includes the Royal Mail's Postcode Address File (PAF) File. Postcode Plus is ideal for intensive address list management or sorting out poor data. With organisations, building names and numbers it can quickly provide a missing postcode or correct a faulty postcode.

There are two different ways of searching for addresses:

1. Search by postcode. The postcode field is focused by default so you can immediately start entering the postcode, there is no need to use the Caps Lock key on your keyboard. When the system

detects that you have entered a valid postcode it will automatically lookup the address. If you wish to search on a partial postcode you will need to click the Search button.

2. If you don't know the postcode you can still search on any part of the address by entering the address info you do have, select the General Search option and then click on the Search button. Be as specific as possible as this could return lots of addresses otherwise. Results are limited to 1,000 addresses.

Select the correct address from the list (progressive key searching can be used) and then click on the button to save the address and exit.

Contact technical support to arrange your upgrade to Estate Agent Pro Enterprise.

New monthly pricing structure per branch: 1 branch £200 * 2-4 branches £150 * 5-9 branches £125 * 10+ branches £100 (10% discount to existing users)
